

ALB, Human Serum Albumin

| | | | |
|--------------------|-----------|------------------|----------|
| Catalog No. | CSI19609A | Quantity: | 10 gram |
| | CSI19609B | | 100 gram |

Alternate Names: ALB, Serum ALB, HSA

Description: Human Serum Albumin is a soluble, monomeric protein comprising about one-half of the blood serum protein. ALB primarily functions as a carrier protein for steroids, fatty acids, thyroid hormones, and also plays a key role in stabilizing extracellular fluid volume.

Source: Human Serum

Molecular Weight: 67 kDa

Formulation: Lyophilized.

Purity: >96% by SDS PAGE

Storage & Stability: Store at 2-4°C. Product is stable for 5 years when stored as directed.

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
