

Rat Anti BrdU Monoclonal Antibody, FITC

DMABT-50289RB Rat(BrdU)

Lot. No. (See product label)

PRODUCT INFORMATION

Product Overview	Rat Anti BrdU, FITC
Host	Rat
Isotype	IgG2a
Species	Chemical
Clone	CV2/86 (JDS2)
Conjugation	FITC
Applications	IHC, FCM,
Dilution	FCM: Neat - 1/20

PACKAGING

Format	Purified IgG conjugated to Fluorescein Isothiocyanate Isomer 1 (FITC) - liquid
Buffer	Phosphate buffered saline
Storage	Store at +4 °C or at -20 °C if preferred. This product should be stored undiluted. Storage in frost free freezers is not recommended. This product is photosensitive and should be protected from light. Avoid repeated freezing and thawing as this may denature the antibody. Should this product contain a precipitate we recommend microcentrifugation before use.
Preservative	0.01% Sodium Azide 50% Glycerol
Shelf Life	18 months from date of despatch.

BACKGROUND

Introduction	The immunocytochemical detection of bromodeoxyuridine (BrdU) incorporated into DNA is a powerful tool to study the cytokinetics of normal and neoplastic cells. In vitro or in vivo labeling of tumor cells with the thymidine analogue BrdU and the subsequent detection of incorporated BrdU with specific anti-BrdU monoclonal antibodies is an accurate and comprehensive method to quantitate the degree of DNA-synthesis. BrdU is incorporated into the newly synthesized DNA of S-phase cells may provide an estimate for the fraction of cells in S-phase. Also dynamic proliferative information such as the S-phase transit rate and the potential doubling time can be obtained, by means of bivariate BrdU/DNA flow cytometric analysis.
