

Human MFGE8 ORF

Catalog Number: HG10853-M

General Information

Gene Bank Ref. ID : NM_005928.2

ORF Size: 1164

Gene Name Synonym:

BA46; SED1; hP47; EDIL1; SPAG10;
OAcGD3S; HsT19888; MFGE8

Source: Human

Description

ORF Description:

ORF Clone of Homo sapiens milk fat globule-EGF factor 8 protein DNA.

Vector :

Commercial available pMD Vector

Sequence Description:

Identical with the Gene Bank Ref. ID sequence except for three point mutations:226C/A resulting in the amino acid 76Leu substitution by Met, 267G/A and 1155G/A not causing the amino acid variation.

Shipping

5-10µg Plasmid DNA is shipped on Whatman FTA elute card (Cat. No.: WB120410) at room temperature.

It would take 3-5 days for delivery typically. For bulk orders, additional 1-2 weeks would be needed.

Usage Protocol

1. Remove the marked edge in the center of the spot.
2. Transfer the filter paper to a 1.5ml microfuge tube containing 50-100 µl of sterile H₂O Ensure the filter is completely immersed in the H₂O by briefly centrifuging the tube for 10 seconds.
3. Transfer the tube to a heating block at 95°C for 15–30 min
4. At the end of the incubation period remove the sample from the block and pulse vortex, or gently tap, the sample approximately 60 times
5. Briefly centrifuge for 30 seconds, to separate the matrix from the elute. The elute now contains the purified DNA
