Human FSH Protein

Catalogue No.: abx060837

Human FSH Protein is a purified hormone or steroid. This protein is from Human Pituitary.

Target:	Human FSH
Origin:	Human
Host:	Human
Purity:	> 98% (by weight) Contains the following contaminants: hTSH: 0.13% hLH: < 1% hGH: 0.0001% PRL: 0.0062%
Purification:	Purified from Human Pituitary Glands
Form:	Lyophilized
Reconstitution:	Reconstitute using a neutral pH buffer. Avoid extreme high and low pH.
Conjugation:	Unconjugated
Storage:	Upon receipt, store at -20 °C. Avoid repeated freeze/thaw cycles.
Biological Activity:	6217 IU/mg
Buffer:	Does not contain preservatives.
Directions for use:	Centrifuge before opening to ensure complete recovery of vial contents.
Note:	This product is for research use only.
