## **RNA Purification Kit**

Catalogue No.: abx098095

RNA Purification Kit uses silica member-based spin column for specific RNA binding. It is suitable for simple and fast purification of DNase I-treated total RNA, in vitro transcription product, RNA-labelled product, synthetic RNA. This kit permits effective removal of proteins, organic chemicals, inorganic saline ions. Purified RNA can be used in RT-PCR, qRT-PCR, chip analysis, Northern Blot and RNAi.

**Target:** RNA Purification Kit

**Storage:** Store at -20°C. Stable for 12 months from date of receipt.

**Note:** This product is for research use only.
