

TGF beta2 Ab

Cat.#: AF0260
Size: 100ul,200ul

Concn.: 1mg/ml
Source: Rabbit

Mol.Wt.: 47kDa
Clonality: Polyclonal

Application: IHC 1:50-1:200 WB 1:1000

Reactivity: Human, Mouse, Rat

Purification: The antiserum was purified by peptide affinity chromatography using SulfoLink™ Coupling Resin (Thermo Fisher Scientific).

Specificity: TGF beta2 Ab detects endogenous levels of TGF beta2.

Immunogen: A synthesized peptide derived from human TGF beta2.

Uniprot: P61812

Description: TGFB2 TGF-beta 2 has suppressive effects on interleukin-2 dependent T-cell growth. Homodimer; disulfide-linked. Heterodimers with TGFB1 and with TGFB3 have been found in bone. Interacts with the serine proteases, HTRA1 and HTRA3. Interacts with ASPN. Belongs to the TGF-beta family. 2 isoforms of the human protein are produced by alternative splicing.

Subcellular Location: Extracellular region or secreted;

Similarity: Belongs to the TGF-beta family.

Storage Condition and Buffer: Rabbit IgG in phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20 °C. Stable for 12 months from date of receipt.

Western blot analysis on mouse brain lysate using TGF beta2 Ab

Western blot analysis of TGF beta2 Ab expression in mouse brain tissue lysates. The lane on the left is treated with the antigen-specific peptide.

AF0260 at 1/100 staining human lung carcinoma tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

IMPORTANT: For western blot, incubate membrane with diluted primary Ab in 5% w/v milk, 1X TBS, 0.1% Tween@20 at 4°C with gentle shaking, overnight.
