Phospho-Tau (Ser404) Ab

Cat.#: AF3144 Concn.: 1mg/ml Mol.Wt.: 78kDa Size: 100ul,200ul Source: Rabbit Clonality: Polyclonal

Application: WB 1:500-1:2000 IHC 1:50-1:200

Reactivity: Human, Mouse, Rat

Purification: The Ab is from purified rabbit serum by affinity purification

via sequential chromatography on phospho- and non-

phospho-peptide affinity columns.

Specificity: Phospho-Tau (Ser404) Ab detects endogenous levels of Tau

only when phosphorylated at Serine 404.

Immunogen: A synthesized peptide derived from human Tau around the

phosphorylation site of Serine 404.

Uniprot: P10636

Description: This gene encodes the microtubule-associated protein tau

(MAPT) whose transcript undergoes complex, regulated alternative splicing, giving rise to several mRNA species. MAPT transcripts are differentially expressed in the nervous system, depending on stage of neuronal maturation and

neuron type.

Subcellular Location: Cytoplasm > cytosol. Cell membrane. Cytoplasm >

cytoskeleton. Cell projection > axon. Mostly found in the axons of neurons, in the cytosol and in association with

plasma membrane components.

Tissue Specificity: Expressed in neurons. Isoform PNS-tau is expressed in the

peripheral nervous system while the others are expressed in

the central nervous system.

Similarity: The tau/MAP repeat binds to tubulin. Type I isoforms contain

3 repeats while type II isoforms contain 4 repeats.

Storage Condition and

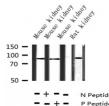

Buffer:

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20

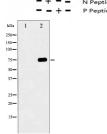

°C.Stable for 12 months from date of receipt.

Western blot analysis of Phospho-Tau (Ser404) expression in various lysates

Western blot analysis of Tau phosphorylation expression in UV treated 293 whole cell lysates, The lane on the left is treated with the antigen-specific peptide.

AF3144 at 1/200 staining Rat lung tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.
