## Phospho-p70 S6 Kinase (Ser371) Ab

Cat.#: AF3227 Concn.: 1mg/ml Mol.Wt.: 70kDa Size: 100ul,200ul Source: Rabbit Clonality: Polyclonal

Application: WB 1:500-1:2000 IHC 1:50-1:200, IF/ICC 1:100-1:500

Reactivity: Human, Mouse, Rat

Purification: The Ab is from purified rabbit serum by affinity purification

via sequential chromatography on phospho- and non-

phospho-peptide affinity columns.

Specificity: Phospho-p70 S6 Kinase (Ser371) Ab detects endogenous

levels of p70 S6 Kinase only when phosphorylated at Serine

371.

Immunogen: A synthesized peptide derived from human p70 S6 Kinase

around the phosphorylation site of Serine 371.

Uniprot: P23443

Description: This gene encodes a member of the RSK (ribosomal S6

kinase) family of serine/threonine kinases. This kinase contains 2 non-identical kinase catalytic domains and phosphorylates several residues of the S6 ribosomal protein.

Subcellular Location: Cytoplasm; Nucleus. Cytoplasm and Cell junction > synapse

> synaptosome. Mitochondrion outer membrane.

Tissue Specificity: Widely expressed.

Similarity: The autoinhibitory domain is believed to block

phosphorylation within the AGC-kinase C-terminal domain and the activation loop. The TOS (TOR signaling) motif is essential for activation by mTORC1. Belongs to the protein kinase superfamily. AGC Ser/Thr protein kinase family. S6

kinase subfamily.

Storage Condition and

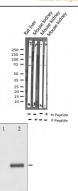

Buffer:

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20

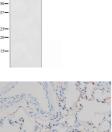

°C.Stable for 12 months from date of receipt.

Western blot analysis of Phospho-p70 S6 Kinase (Ser371) expression in various lysates

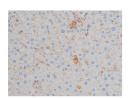

Western blot analysis of p70 S6 Kinase phosphorylation expression in serum treated COLO205 whole cell lysates. The lane on the left is treated with the antigen-specific peptide.

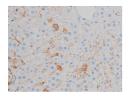

AF3227 at 1/200 staining Rat spleen tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5. hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3227 at 1/200 staining Rat spleen tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

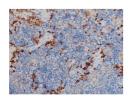

AF3227 at 1/200 staining Rat liver tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3227 at 1/200 staining Mouse heart tissue sections by IHC-P. The tissue was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The tissue was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

AF3227 staining NIH-3T3 by IF/ICC. The sample were fixed with PFA and permeabilized in 0.1% Triton X-100,then blocked in 10% serum for 45 minutes at 25°C. The primary Ab was diluted at 1/200 and incubated with the sample for 1 hour at  $37^{\circ}$ C. An Alexa Fluor 594 conjugated goat anti-rabbit IgG (H+L) Ab, diluted at 1/600, was used as the secondary Ab.

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1X TBS, 0.1% Tween020 at  $4^{\circ}$ C with gentle shaking, overnight.
