

Keratin 19, clone RCK 108 Monoclonal Antibody

Catalog No.: MON3020

Quantity: 1 ml

Specificity

The antibody reacts with the human keratin 19, a 40 kDa polypeptide. Antigen origin: human bladder cell line T24. Antigen location: Cytoplasm.

Immunoglobulin type

Murine IgG₁

Use

This antibody can be used in various immunoassays:

- a) Immunocytochemistry/immunofluorescence on cultured cells. Strongly positive on the majority of acetone fixed cells.
- b) Immunohistochemistry on frozen sections. Strongly positive on epithelial structures known to express keratin 19 in acetone fixed sections.
- c) Immunohistochemistry on paraffin embedded sections. Strongly positive with formaldehyde fixed sections.

Approximate working dilution 1:10-20.

Presentation

1 ml. tissue culture supernatant in PBS with 0.1% BSA and 0.1% sodium azide.
