

Human IgG1 Lambda Isotype Control [Biotin] (DAGIC1194-B)

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Isotype	IgG1, λ
Source/Host	Human
Species Reactivity	N/A
Purification	Purified
Conjugate	Biotin
Applications	ELISA
Format	Liquid
Concentration	Lot specific
Size	100 µg
Buffer	PBS
Preservative	None
Storage	Store at 2-8°C.
Ship	Wet ice
Warnings	This product is for research use only and is not intended for diagnostic use.

BACKGROUND

Introduction	<p>Isotype controls are primary antibodies that lack specificity to the target, but match the class and type of the primary antibody used in the application. Isotype controls are used as negative controls to help differentiate non-specific background signal from specific antibody signal.</p> <p>Depending upon the isotype of the primary antibody used for detection and the target cell types involved, background signal may be a significant issue in various experiments.</p>
Keywords	IgG1 lambda;Immunoglobulin G1 lambda
