Flow cytometric analysis of Human TNFRSF8(CD30) expression on K562 cells. Cells were stained with APC-conjugated anti-Human TNFRSF8(CD30). The histogram were derived from gated events with the forward and side light-scatter characteristics of intact cells.

Flow cytometry was performed on a BD FACSCalibur flow cytometry system. Please refer to www.sinobiological.com/Flow-Cytometry-FACS-Protocols-a-750.html for technical protocols.
